Didactic and Behavioral Analysis in Sport Research Group, Faculty of Sport Science, University of Extremadura, 10003 Cáceres, Spain

Deadline for manuscript submissions:

closed (30 September 2022)

Message from the Guest Editors

Dear Colleagues,

healthy lifestyle involves the acquisition maintenance of habits that promote people's health, such as having appropriate eating habits, healthy resting habits, avoiding stress and the consumption of tobacco, alcohol, and other drugs, in addition to the regular practice of physical activity. It is very important that adherence to habits that configure healthy lifestyles be adopted from an early age to avoid premature morbidity, as well as to alleviate other diseases associated with unhealthy lifestyles. In order to highlight the importance of physical activity, which we consider to be one of the factors crucial to the development of healthy lifestyles as it is associated with positive behaviors that are part of such lifestyles, we are interested in research aimed at the analysis and development of strategies to encourage the practice of regular physical activity to support the promotion of healthy behavior patterns. Also, we intend to publish studies that analyze and demonstrate the importance of maintaining a healthy lifestyle in order to improve quality of life

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
