submissions:

**closed (31 March 2019)**

### Message from the Guest Editor

Dear Colleagues,

Different aspects of parenting play a significant role in child development. These effects may span long into adulthood. However, there is still much to be learned on the effects of parenting on health and well-being of the offspring. For instance, more knowledge is needed on the interactions between parenting and child genotypes, moderating effects of race/ethnicity, and moderating effects of timing of parenting in relation to developmental stage. There are also recent challenges, such as increased media use by parents and by children, which are likely to affect parenting and child outcomes in the ways that are not well understood yet.

This Special Issue is open to quantitative longitudinal studies in subject areas related to “Parenting and Offspring Health and Well-Being”.

Prof. Dr. Mirka Hintsanen

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
