Message from the Guest Editors

Physical medicine and rehabilitation is the interprofessional, transversal and global health speciality that aims to improve the physical function of patients in order to reduce disability and improve quality of life. With all this, the patient will have an improvement in social development and activities of daily living. The health situation after the pandemic due to COVID-19 has changed and different tools for rehabilitation of patients with musculoskeletal disorders including chronic pain have started to be used telematically for treatments. There is a need for a special issue that includes the study of all these new therapeutic options for the treatment of patients with musculoskeletal disorders including chronic pain both conventionally and through telerehabilitation. The aim of this Special Issue is to collate the latest high-quality clinical articles and systematic reviews through meta-analyses (also umbrella reviews with meta-meta-analyses), which address physical and rehabilitation issues in musculoskeletal patients (both face-to-face and telematically).

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
