submissions:

closed (31 December 2019)

Message from the Guest Editor

Dear Colleagues,

We are organizing a Special Issue on the topic of how people and social groups face the problems of an increasingly complex and globalized society. This includes mainly, but not only, the interaction of psychosocial well-being and mental health with economic, gender, racial, and ethnical inequalities; migration and demographic change; conflict and war; and the effects of stigma on people discriminated because of their differential characteristics, whether sexual, disability-related, or minority membership-related.

This Special Issue is open to any subject area related to the impacts of social issues on mental health and psychosocial wellbeing. We are interested in empirical and theoretical enquiries at all ecological levels, from the psychosocial impact of social dynamics on individuals to the analysis of how sociocultural and geopolitical factors influence health and collective psychosocial well-being.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
