Message from the Guest Editor

As a result of the pandemic's spread, outdoors activities were reduced to the bare minimum, bringing about problems such as reduced and insufficient physical activity. Social media has been widely used to publish information on disease risks, health lifestyles, and pandemic prevention policies, and public opinion online also affected public awareness of COVID-19 prevention and control policies. Meanwhile, community governance was more obvious in terms of COVID-19 control and citizen health. The prolonged existence of the pandemic has introduced not only attitudinal changes, however; it has also brought forth new challenges to public health.

In order to promote public health in the context of pandemic prevention and control, we are launching this Special Issue on “Public Health Issues under Regular Epidemic Prevention and Control”. This Special Issue aims to provide a platform for publishing and sharing the latest progress in public health research, particularly in the context of the pandemic. We welcome scholars from around the world to submit manuscripts such as original articles, case reports, comments, and reviews.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
