Message from the Guest Editors

This Special Issue aims to highlight the issues raised during the recovery process from the COVID-19 pandemic and the challenges that societies must face to recover the wellbeing of those who suffer from PASC and to investigate the negative impact of the restrictions imposed, including economic ones. We also want to highlight any disparities between genders and among social classes, provoked or emphasized during the recovery process from the ongoing pandemic, and possible actions to minimize these inequities. However, we also want to highlight the positive aspects and opportunities associated with this dramatic experience, such as the increase in and improvement of skills and the rapid technological advances that have taken place during this period, as well as the opportunities to improve one's lifestyle, to better manage work and leisure time, and to improve the quality of the relationships with others. Authors are invited to contribute to this Special Issue with original research and review articles.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
