Message from the Guest Editors

Suicide and self-harm present a major global health concern. In recent years, there has been a substantial increase in interest regarding the impact of the Internet on these behaviors, and considerable research efforts have been devoted to understanding and managing suicide and self-harm on the Internet. However, knowledge on how suicidal and self-harming individuals conduct themselves online still remains limited. To that end, we are pleased to invite you to participate in a Special Issue on “Suicide and Self-harm behaviors on the Internet” in the International Journal of Environmental Research and Public Health. This Special Issue aims to include high-quality research and reviews addressing all relevant aspects of this topic, including (but not limited) to phenomenology and epidemiology, theoretical models, assessment, prevention, and intervention of suicide and self-harm on the Internet. Submissions that focus on innovative methodologies and novel data resources are particularly welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
