Message from the Guest Editors

Dear Colleagues,

Orthopedic and trauma services have been disrupted in most countries due to the COVID-19 pandemic, and both outpatients and inpatients have been affected. Telemedicine and eHealth applications are recommended as available and possible solutions. Both telemedicine (TM) and eHealth (eH) are undergoing extensive development and gaining more and more acceptance in various clinical specialties, including orthopedics and traumatology, around the world. The digitization of medicine and the rapid growth of mobile and home devices have affected the recognition of such technologies and the growing interest of both medical professionals and patients. With challenging circumstances restricting travel possibilities, it is important to gain a full understanding of telemedicine solutions and remote health surveillance applications for their practical use.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
