Message from the Guest Editor

Smoking is a multifaceted behavior that puts people at risk for morbidity and mortality. We increasingly understand that smoking, and tobacco use generally, occurs at the intersection of psychological and social factors. This Special Issue seeks to give space for research that considers complex intersections that impact tobacco use and cessation, focusing on demographic intersectionality, the interaction between other substance use and smoking cessation, the impact of policy and physical environment on tobacco use and cessation, and other topics considering multilevel or multifaceted issues related to tobacco use or tobacco cessation.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
