

Wearable Sensors and Robotic Devices to Prevent and Monitor Work-Related Diseases

Guest Editors:

Dr. Juri Taborri

Department of Economics,
Engineering, Society and
Business Organization, Tuscia
University, Largo dell'Università
Snc, 01100 Viterbo, VT, Italy

Dr. Simone Pasinetti

Vis4Mechs Lab, Department of
Mechanical and Industrial
Engineering, University of
Brescia, 25123 Brescia, Italy

Deadline for manuscript
submissions:

closed (31 July 2022)

Message from the Guest Editors

This Special Issue aims to promote innovative technologies and methodologies for the assessment of worker motion and health condition, as well as the development of supporting robotic devices. Original research contributions as well as review articles are welcome.

Potential topics include but are not limited to the following:

- Innovative methodologies for worker motion analysis and health condition monitoring;
- Application of wearable sensors for worker motion analysis and health condition monitoring;
- Design of innovative sensors for worker motion analysis and health condition monitoring;
- Application of robotic devices for supporting workers;
- Design of innovative robotic devices for supporting workers;
- Artificial intelligence for evaluating work safety;
- Algorithms for evaluation of ergonomic worker condition;
- Synthetic indices for work-related disorder prevention;
- Guidelines for the implementation of specific programs to address worker safety.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
