Message from the Guest Editors

Workplace bullying (also known as mobbing at work) is an extreme social stressor leading to negative consequences for both the targeted individuals and their organizations. We particularly welcome studies on workplace bullying implementing robust research designs, including intervention studies, longitudinal studies, multilevel investigations focusing on individuals within teams/groups or organizations, diary studies adopting an intra-individual perspective, person-centered studies and research employing multisource data. Cross-sectional studies may also be considered, especially if they offer original perspectives or insights on underinvestigated topics in the field (e.g., cyberbullying, cross-over of bullying effects, etc.).

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
