Message from the Guest Editors

A major trend in modern working life is the digitalization of organizations as means to meet demands and be competitive. Transitions involving digitalization challenge current working life practices and management on how to ensure occupational health and safety. As part of the digital changes taking place in today's organizations, there are several relevant questions which arise, e.g., how will the emergence of new business models and non-standard work arrangements affect workers? How can work be organized and regulated to achieve sustainable working conditions for all workers, including vulnerable groups? How will technological change and developments toward autonomous systems influence health and safety? What is the level of compliance in relation to health and safety regulations, and what are the roles of management and training? How do new ways of organizing work relate to workers' work-life balance, creativity, and wellbeing? Papers dealing with these topics and questions are of particular interest in this Special Issue. Studies can include different methodological approaches as well as intervention studies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
