Deadline for manuscript  
submissions:

**closed (30 September 2022)**

### **Message from the Guest Editors**

We would like to invite authors from Central and Eastern European countries to participate in this Special Issue, focusing on child and adolescent health. We propose a broad scope of topics, and only the geographical region and age group are criteria for eligibility. Review articles and original papers based on administratively collected data (such as mortality statistics) as well as survey results will be considered. The thematic scope of the original papers combines objective and subjective evaluation of health with health-related behavior, both in the context of assessing the scale of problems and trends as well as determinants. It would be important to look at health in its various dimensions, not only physical and mental, but also social and spiritual. We encourage reference to research directions aimed at empowerment of the young generation in the context of health. The papers may concern one country, but studies including data from groups of countries are a priority. It would be worth sharing the conclusions of studies performed in Eastern and Central Europe and their practical implications, which may have a more global impact.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
