

Special Issue

The Exposome and Child Neurodevelopment

Message from the Guest Editors

This Special Issue will profile research applying an exposome approach to investigate the etiology of child neurodevelopment. We encourage submissions from around the globe, with special interest in large-scale epidemiological studies examining environmental factors of multiple dimensions (and their interactions) and neurodevelopment of children (

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
