

## Special Issue

# State of Health and Quality of Life of Women: 2nd Edition

### Message from the Guest Editor

The relationship between health status and quality of life greatly depends on age group, with different aspects through the stages of women's lives. Puberty, reproductive age, postmenopausal period, and elderly age, as well as pregnancy and delivery, are life events that affect women in a unique way. We especially invite papers on urogynecology and its related topics. Pelvic floor dysfunctions are the reason for many conservative and surgical interventions in females that have a significant impact on physical and social limitations as well as family and partner relationships. Urinary incontinence, pelvic organ prolapse, fecal incontinence, and sexual dysfunctions are common morbidities that lower female quality of life. Both primary and secondary prophylactic measures for diagnosing patients that require an intervention will ensure improved quality of life. We also invite researchers to submit original research and review articles on female quality of life and sexual function assessment.

### Guest Editor

Dr. Magdalena Emilia Grzybowska

Department of Gynecology, Obstetrics and Neonatology, Medical University of Gdansk, Smoluchowskiego 17, 80-214 Gdańsk, Poland

### Deadline for manuscript submissions

closed (31 January 2025)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
