

Special Issue

Youth-Focused HIV Prevention Innovations in High-Need Populations

Message from the Guest Editors

This Special Issue of *IJERPH* will spotlight cutting-edge innovations in HIV prevention targeting youth and young adult populations, particularly in high-need communities disproportionately affected by the epidemic. We seek contributions that explore novel strategies, technologies, and community-based interventions aimed at reducing HIV risk, increasing testing and PrEP uptake, and addressing social determinants of health. This issue welcomes original research, implementation science, policy analysis, and case studies that highlight culturally tailored approaches, digital health tools, peer-led initiatives, and structural interventions.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
