

Special Issue

Caring for a Vulnerable Population: Reservists, Military Veterans and Their Families Navigating Care Across Health Sectors

Message from the Guest Editor

This Special Issue will focus on three unique populations that are not typically viewed as being vulnerable, but who do experience unique impacts on their health and well-being by virtue of their work. The first population are the serving Service Members in the military Reserve Components. A second population are those who formerly served in the U.S. military but who are now classified as veterans and who may be receiving some or all their health care in the civilian/public health care space, as are their family members. The third population of interest are the family members of veterans or reservists and their own health and well-being as they navigate the civilian health care system.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
