

Special Issue

Indoor Air Quality and Monitoring: Volatile Organic Compounds

Message from the Guest Editor

Indoor Air Quality and Monitoring: Volatile Organic Compounds is a Special Issue dedicated to exploring the current state of indoor air quality and the role of volatile organic compounds (VOCs) in determining air quality. This issue gathers experts in the field to discuss the latest research and advances in indoor air quality monitoring and the impact of VOCs on human health. Topics covered in this Special Issue include the sources and impacts of VOCs, the latest monitoring technologies, and effective strategies for reducing indoor VOC levels. The papers in this issue provide valuable insights for researchers, policymakers, and the public alike.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
