

# Special Issue

## Physiology in Sports Training

### Message from the Guest Editor

Physiology in sport training is an important topic for increasing the performance of athletes. In recent years, research on this topic has greatly increased. Practical applications of this research are very useful for coaches and performance analysts. Advances in knowledge and technology now allow us to investigate and learn about the physiology of exercise more precisely. Today, we can measure the physiology of athletes during training and competitions to improve their performance. Papers addressing these topics are invited for this Special Issue, especially those combining a high academic standard with a practical focus.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
