Special Issue

Urban Environmental Quality and Its Health Impacts

Message from the Guest Editor

Urban areas around the world are facing a range of environmental health challenges including the contamination of air, water and soil; traffic congestion and noise: and household waste. The additional pressure of climate extremes and the recent global impacts of coronavirus and a challenging economic system provide important drivers for underlying human responses. Environmental quality directly affects health status and plays a major role in quality of life, years of healthy life lived, and health disparities. All these highlight the need for a systems-based understanding of urban environment and public health. This Special Issue intends to provide an opportunity for the research community to publish the latest results from illustrating the issue "Urban Environmental Quality and Its Health Impacts". We look forward to your related papers.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers.

Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
