

## Special Issue

# Mental Health and Wellbeing of Children and Adolescents

### Message from the Guest Editor

During the last two decades, behavioral and emotional problems among children and adolescents have emerged as a major cause of concern in industrialized nations. These problems are associated with an increased risk of mental illness, impaired social relationships, substance abuse, and poor educational attainment in children and adolescents. There is some emerging consensus that measures of wellbeing are multidimensional and should include a set of indicators related to physical, mental, and social wellbeing. The relative importance of supportive relationships that are typically formed in children's environments, including home, school, and hospital settings, is debatable, although they are undoubtedly one of the key protective factors against poor mental health in children. Formative research is needed to understand and underline evidence-based approaches to achieve better wellbeing in children.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
