Intelligent Data Mining/Analytics Approaches in Healthcare

Message from the Guest Editors

We welcome studies on all types of data-driven approaches in healthcare for the purpose of providing readers with the latest information on the potential use of AI and machine learning in helping to improve early, consistent, and precise disease diagnosis. It is our belief that high-quality studies in this field will ultimately lead to the next milestone for the application of AI in the early detection and treatment of diseases, and we invite you to take part in the process. In order to facilitate your decision-making process, we have listed some keywords below that provide examples of the possibilities available.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
