

Special Issue

3rd Edition: Social Determinants of Health

Message from the Guest Editors

Potential topics include, but are not limited to, the following:

- Papers that discuss, refine, or test theoretical models specifying the relationship between social determinants, the health of marginalized populations, and the presence of health disparities.
- Papers that emphasize an intersectional approach (e.g., race, gender, and social class) in advancing our understanding of social determinants and health disparities.
- Papers that highlight how social determinants have implications for individual- (e.g., discrimination), place- (e.g., urbanicity), and community-oriented (e.g., segregation) factors and their contribution to health disparities.
- Descriptions of epidemiological studies explicitly examining social determinants and their association with the health of marginalized populations or health disparities.
- Descriptions of intervention studies that consider how social determinants of health affect health among marginalized populations or reduce health disparities.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
