

## Special Issue

# New Advances in Biomass Conversion and the Environmental Implications

### Message from the Guest Editors

Biomass conversion creates no carbon dioxide emissions in life cycle applications. However, the backward technology for the utilization of biomass, such as non-standard combustion and general landfill, result in secondary pollution. This Special Issue, entitled “New Advances in Biomass Conversion and the Environmental Implications”, mainly covers research in the fundamental and applied sciences of biomass conversion, bio-materials, and utilization, with the aim of the development of technology for carbon neutrality and the control of environmental pollution. The scope of this Special Issue includes, but is not limited to, the following topics: (1) fuel, fertilizer, and feed production from the optimized process of biomass, (2) advances in the conversion of biomass to chemicals and materials, (3) fundamental and applied sciences of biomass biochemical conversion, (4) the environmental implications of bio-materials, (5) low-carbon economy sustainability based on biomass processing, and (6) pollution control.

### Guest Editors

#### Dr. Peng Liu

1. National-Local Joint Engineering Research Center of Biomass Refining and High-Quality Utilization, Institute of Urban and Rural Mining, Changzhou University, Changzhou 213164, China
2. Jiangsu Key Laboratory of Process Enhancement & New Energy Equipment Technology, Nanjing University of Technology, Nanjing 211816, China

#### Dr. Dongze Niu

Changzhou Key Laboratory of Biomass Green, Safe & High Value Utilization Technology, Institute of Urban and Rural Mining, Changzhou University, Changzhou 213164, China

### Deadline for manuscript submissions

closed (10 April 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
