

## Special Issue

# 2nd Edition: Impacts of Indoor Environments upon Public Health and Wellbeing

### Message from the Guest Editor

The significance of 'healthy' indoor environments has come to the fore.

The evaluation of relevant interventions, through quantitative or mixed methods;

The prevalence of exposure to risk factors (e.g., physical hazards and social determinants), through monitoring or modelling studies;

Dose-response relationships and/or potential for synergistic effects across parameters of environment quality upon health and wellbeing outcomes;

Evaluation of health inequalities arising from relevant parameters such as temperature, air quality, lighting, soundscapes, indoor space provision and access to green space;

Impact of 'smart' technologies and/or artificial intelligence applied to buildings for enhanced health and wellbeing (including aspects related to the digital exclusion);

Standards, best practices and policy approaches to improve population health via changes to indoor environments and their immediate surroundings.

Papers addressing the topics above are invited for this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
