

Special Issue

Urban Land Utilisation and Disaster Resilience

Message from the Guest Editors

This Special Issue focuses on the complex relationships between urban land utilization and disaster resilience. It aims to encourage interdisciplinary academic discussion on reducing natural hazard risks and provide stakeholders and policy-makers with multiple paths to increasing resilience of cities and communities. In this Special Issue, we welcome research contributions on topics including, but not limited to, the following:

- Built environments of cities and neighborhoods;
- Social capital and resilient communities;
- Urban sprawl and disaster resilience;
- Stakeholders in disaster management;
- Spatial planning, governance, and disaster resilience;
- Spatial and social inequalities in disaster resilience;
- New data and methods in urban land utilization and disaster resilience;
- Urban land-use transitions and environmental impact.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
