

Special Issue

2nd Edition of Perspective Expanded: Healthcare from the Perspectives of Patients, Actors, and System Users

Message from the Guest Editor

This Special Issue will focus on patients' perspectives as experts, on their challenges and healthcare-related experiences embedded in a biopsychosocial framework. Research on experiences regarding health, health care, but also illness will build the core of this issue by focussing on qualitative research methods mainly from patients' perspectives and or their corresponding surroundings. They will not only provide insights into complex healthcare situations, ethical related questions but also into patient-centered challenges as a possible starting point for improving healthcare systems and or policy. An interprofessional perspective on health care providers, family members, or key caregivers of patients, clients, and users are most welcome. In addition, we are hoping for contributions from the medical humanities, and topics on community health including health literacy.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
