

Special Issue

2nd Edition of Sustainable Cities: Environmental Regeneration for Healthier Lives

Message from the Guest Editors

The focus of this Special Issue (SI) is the regeneration of cities to promote healthier lives, a subject could not be more topical today. When we were invited to edit the 1st edition of this SI (31 December 2019), we had no means to foresee the darkness and complexity of the forthcoming period due to the COVID-19 pandemic.

Quickly, all over the world, cities' streets became empty with a quietness that translated to global insecurity and uncertainty. However, as the world started to recover from the shock and to reorganize itself, the words "reset" and "regeneration" became commonplace. The recent pandemic proved that we need to regenerate our lives to promote resilience and adaptation, both individually and collectively, which means we must build sustainable ways of living. What makes a city attractive and resilient, allowing its inhabitants to flourish and fulfil their dreams while living a healthy and safe life? How do cities find ways to reconcile with nature?

Papers that focus on emergent issues of urban spaces based on environmental regeneration, urban health issues, and the promotion of wellbeing and healthy lifestyles are particularly welcome.

Guest Editors

Dr. Gisela Marta Oliveira

Dr. Rui Leandro Maia

Prof. Dr. Maria Pia Ferraz

Dr. Paula Cristina Maia Teixeira

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
