

Special Issue

2nd Edition of Survey about Psychological Health

Message from the Guest Editors

This 2nd Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focuses on the current state of knowledge on psychological health and its risk and protective factors. Psychological health is of great interest for both researchers and public health specialists due to the high prevalence of psychological health problems, the influence that a person's psychological health status may have on his or her physical health, and the possibility to develop interventions to prevent disorders and promote well-being. Papers dealing with the assessment of any specific factors that might be associated with an increased risk of psychological morbidity or any protective factors that might promote an optimal psychological functioning are welcome. Discussions related to practice implications, indications for intervention, and evidence of treatment efficacy are also welcome.

Guest Editors

Prof. Dr. Paola Gremigni

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
