

## Special Issue

# Environmental Injustice and COVID-19: Challenges and Recommendations

### Message from the Guest Editor

Introduction of harmful contaminants into the environment, whether natural or human made, can damage the quality of air, water, land, and built environment. Inequitable exposure to environmental toxins among communities of color and marginalized populations (e.g., women and girls, children, rural residents, low-income individuals, the LGBTQ+ population, individuals with disabilities, undocumented immigrants, migrants, and refugees) nationally and globally fuels health disparities and threatens health equity. Environmental contamination in the context of health disparities encourages the examination of how environmental racism and injustice intensifies inequities in exposure to environmental pollutants and threatens health equity. Papers on all topics linked to environmental pollution and environmental justice are encouraged in this Special Issue. New research papers, case reports, brief reports, methodological papers, articles, systematic reviews, and commentaries are welcome. The Special Issue welcomes manuscripts across multiple fields and that adopt various quantitative, qualitative, and mixed methodologies.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
