

Special Issue

The Mental Well-Being of Caregivers: Impacts, Benefits and Advancements

Message from the Guest Editor

In this Special Issue, we would like to explore the effects of caregiving on mental well-being, including all three aspects in the caregivers themselves and/or other aspects that are also related to the caregivers. These effects may have a negative impact, or on the other hand, a positive benefit to caregivers. As a public mental health measure, we are also interested in investigating efficacious and effective interventions for the advancement of the mental well-being of caregivers.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
