# Advances and Effectiveness of School-Based Interventions for Wellbeing and Health

### Message from the Guest Editor

Childrens' wellbeing is essential for physical, cognitive, emotional, mental, and social development. Despite making considerable advances in survival rates, globally, a large proportion of children are not developmentally on track in health, learning, and psychosocial wellbeing. Since the needs of children are multidimensional and encompass a 24-hour activity cycle of sleep, physical activity, and sedentary behavior, it is of the utmost importance to establish habits for healthy living in early life. Schools have been identified as an ideal place for intervention, yet the efficacy and effectiveness of interventions only at the school level have varied. A more contemporary approach is to address potential risk factors (such as sedentary behavior and poor sleep quality) at several levels (individual, home, and school) because there is a significant relationship among these levels. Health determinants must be simultaneously addressed to reduce disparities and improve the effectiveness of interventions. Healthier children are more ready to learn, so expanding the reach and scale of school-based interventions is paramount for academic success and wellbeing.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
