

Special Issue

Health, Social Problems and Well-Being of Patients with Chronic Diseases, Quality of Life, and the Need for Emotional and Social Support

Message from the Guest Editors

This Special Issue aims to learn about health, social and emotional problems, assess quality of life, and evaluate the need for social and emotional support for people with chronic diseases. The presence of a chronic disease not only disturbs the functional, physical, and social aspects of life but also evokes negative emotions. This situation causes a decrease in well-being and disturbs the quality of life in all areas. Research on these aspects allows us to obtain valuable information from patients. This concerns not only the symptoms of the disease and side effects of the treatment but also the assessment of the psychological (well-being), social and spiritual dimensions. The results of research into these specific issues occurring in people with chronic diseases will help to direct treatment and patient care through evidence-based medicine EBM (evidence-based medicine) and EBNP (evidence-based nursing practice).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
