

## Special Issue

# End-of-Life Care and Nursing

### Message from the Guest Editors

In this Special Issue, we are glad to provide our readers with novel insights into the topic of end-of-life care and nursing. Our aim is to shed light on this issue from the perspective of different healthcare settings and cultures, as well as different disease-specific challenges. We are delighted to launch this Special Issue of the *International Journal of Environmental Research and Public Health* and invite all experts in the field—clinicians and researchers—around the world to submit their work for consideration. Manuscript formats can vary from literature reviews (systematic literature reviews and meta-analyses or narrative reviews) to original research. We particularly welcome multidisciplinary contributions from all fields of end-of-life care and studies with strong implications for practice.

---

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
