

Special Issue

Family Caregiving, Nursing and Health Promotion

Message from the Guest Editor

This Special Issue aims to explore the dynamic relationships between family caregiving, nursing practice, and health promotion, with a focus on research that enhances the well-being of both caregivers and care recipients. We welcome studies that examine innovative nursing interventions, health promotion strategies, and policies that recognize and integrate family caregivers as essential members of the healthcare system. We welcome original research, reviews, theoretical papers, and practice-based studies on topics:

- Nursing interventions for family caregivers;
- Caregiver-centered care and health promotion strategies;
- Impact of family caregiving on physical and mental health;
- Equity, diversity, and inclusion in caregiving and nursing;
- Technological innovations and digital health for caregiver support;
- Workforce and policy approaches to supporting caregivers;
- Resilience, burnout prevention, and self-care among caregivers;
- Cross-cultural perspectives on family caregiving;
- Palliative and end-of-life care: the role of family caregivers and nurses.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
