

Special Issue

Development and Future Prospects of Urban and Industrial Sewage Treatment and Resource Utilization

Message from the Guest Editors

Urban and industrial sewage treatment is a research hotspot in the environmental field. This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focuses on advanced treatment, saving energy, and reducing consumption of urban sewage treatment. New research papers, reviews, case reports, and conference papers are welcome for submission to this issue. Here are some examples of topics that could be addressed in this Special Issue:

- New technology for urban and industrial sewage treatment;
- Theory and process of biological nitrogen and phosphorus removal;
- Advanced treatment of urban and industrial sewage;
- Advanced oxidation technology for sewage treatment;
- Waste recycling for sewage treatment;
- Constructed wetlands and other ecological treatment methods;
- Sludge treatment and recycling for removal of nitrogen and phosphorus from sewage;
- Microalgae and bacteria for sewage treatment;
- Removal of micro-pollutants from urban and industrial sewage;
- Resource and energy recovery in sewage treatment process;
- Other topics related to urban and industrial sewage treatment.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
