

Special Issue

2nd Edition: Rehabilitation in Health Systems, Rehabilitation Needs and Innovative Rehabilitation Programs

Message from the Guest Editors

The number of people who are in need of rehabilitation worldwide is constantly increasing. At the same time, the implementation of rehabilitation services in health systems in many parts of the world is still scarce. Additionally, in some countries with highly developed health systems, specific user groups are neglected in terms of access to specific rehabilitation services. Special Issue “Rehabilitation in Health Systems, Rehabilitation Needs, and Innovative Rehabilitation Programs”, has been successful so far in that 9 papers have been published. To continue publishing research on the latest advances in the field, this Special Issue was reopened. Like the first Special Issue, scientific articles with new information on the integration of rehabilitation in health systems; rehabilitation needs; as well as the outcomes of rehabilitation programs are welcome. As rehabilitation is an emerging field, conceptual and methodological papers are also welcome. As there are significant research gaps in rehabilitation care in low- and lower-middle-income countries, we particularly invite articles that cover concepts and innovation in such settings.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
