

## Special Issue

# Second Edition of Child and Adolescent Well-Being: Perspectives from Research and Clinical Practice

### Message from the Guest Editor

The aim of the current Special Issue is to publish relevant papers dealing with well-being assessment, care, and interventions during infancy, childhood, and adolescence. We look forward to receiving contributions from both research and clinical practice.

Multidisciplinary papers based on both quantitative and qualitative approaches are of interest. Studies involving self- and/or other informant reports are welcome, as are those dealing with a multimethod approach.

Manuscripts discussing issues across different settings and cultures are appreciated. We welcome the submission of original research papers, case studies, reviews, notes, comments, etc. We hope that this Special Issue will provide readers with new insights and practical information on how to assess, promote, and improve psychological well-being during childhood and adolescence. We encourage authors to send an abstract and a tentative title in advance.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
