

Special Issue

The Effect of Social Media on Adolescent Health Behaviors and Health-Related Outcomes

Message from the Guest Editor

This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* will focus on current research investigating the effect of social media on adolescent health behaviors and health-related outcomes. New research papers, reviews, and conference papers are welcome for submission, including any research that investigates the development and effectiveness of interventions and approaches for reducing the impact of social media on adolescent well-being, as well as new approaches for measuring social media use. We welcome methodological papers, position papers, brief reports, and commentaries related to this topic.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
