Special Issue

Digital Health Education in the Health Professions

Message from the Guest Editor

This Special Issue focuses on a broad definition of digital health. Examples include, but are not limited to, the use of electronic health records and integrated technologies (e.g., clinical decision support); mobile health applications for use by patients and/or health care providers; the use of machine learning and/or artificial intelligence to support clinical decision-making and/or population health improvements; and the security, privacy, and interoperability of electronic health information. All health and health-related professions are welcome to submit a manuscript for consideration, but all manuscripts must address educational efforts to support the advancement of digital health.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:
CiteScore - Q1 (Public Health, Environmental and Occupational Health)
