

## Special Issue

# Advances in Primary Health Care and Community Health

### Message from the Guest Editors

Since the beginning of the global health emergency generated by the COVID-19 pandemic in early 2020, numerous research groups have focused their work on evaluating aspects related to the pandemic itself (vaccines, transmission mechanisms, detection tests, symptom control, etc.). Although this new research focus has been necessary and positive, the priority of researching aspects related to the current emergency should not make us forget the importance of continuing research into other relevant areas of knowledge, as is the case here, with the aim of continuing to generate scientific advances in this field. In this sense, many research groups have continued to develop, in many cases with significant limitations and difficulties, but with the required scientific rigor, their lines of research during this period of pandemic. This Special Issue focuses on this research. Specifically, we want to make visible the research carried out in aspects related to community health during the pandemic period, so we welcome original articles and critical reviews developed with this approach, in this period.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
