

## Special Issue

# The Role of Family Support in Children's Mental Health

### Message from the Guest Editor

One important focus of this Special Issue will be Family Peer Support (FPS) provided by those with lived experience raising a youth with mental health conditions. This service has the potential to improve both youth and caregiver outcomes by overcoming system- and individual-level barriers to care, as well as building parental self-efficacy to improve their identification of mental health problems, awareness of services, and support their initial and continued involvement, especially for families experiencing multiple physical and mental health issues, as well as socio-economic stressors. Progress has been made toward greater specification of FPS program models, core competencies, certification and research on the short- and long-term impacts of such models on youth and family outcomes. This Special Issue will be the first to unite cutting-edge research, evaluation and implementation of family support initiatives across the globe.

### Guest Editor

Prof. Dr. Bruno Anthony

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
