

Special Issue

Violence Intervention in the Workplace and Family

Message from the Guest Editors

Prevention and intervention efforts to deal with family violence include programs directed at children, parents, victims, offenders, couples, or families, based on different approaches (e.g., cognitive-behavioral, psychoeducational), modalities (e.g., individual, group), and implemented in different settings (e.g., school, community, prison). Interventions for workplace violence prevention include prevention, protection, and treatment approaches, aiming to reduce the risk of violence or improve the handling of violent incidents, and can be implemented at an environmental, organizational, and/or behavioral level. Papers addressing these topics are invited for this Special Issue, especially those focusing on innovative intervention and/or prevention responses to deal with family and workplace violence.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
