Environmental Sustainability: Knowledge, Attitudes and Behavior

Message from the Guest Editors

Since the second half of the 21st century, environmental concerns have been generating significant worldwide attention. The harmful effects of irresponsible and consequential actions are increasingly evident, affecting ecological systems and human health in a profound manner. Faced with this increasingly unsustainable footprint, governments, organizations, and civil society must act now and adopt effective measures to mitigate environmental issues and promote sustainable development. In this context, it is extremely important that the general population has access to more information, education, and knowledge on environmental protection; develop a more environmentally friendly attitude; and adopt pro-environmental behavior on a daily basis.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
