

Special Issue

Psychological Well-Being across the Lifespan— Antecedents and Consequences

Message from the Guest Editor

The purpose of this Special Issue is to provide an academic forum for theoretical and empirical examples of current research examining factors and processes responsible for shaping psychological well-being across lifespan. We invite scholars from social sciences, biomedical and health sciences, and humanities backgrounds to submit high-quality papers that focuses on antecedents and consequences of psychological well-being across lifespan. Here are some examples of potential topics that could be addressed in this Special Issue:

- Psychological well-being and mental illness
- Stress, coping, and well-being
- Changes in psychological well-being across lifespan
- Well-being and posttraumatic growth
- Promoting psychological well-being in schools and workplaces
- Psychological well-being and mental health
- Substance abuse and well-being
- Human development and quality of life
- Well-being and social support
- Personality and well-being
- New approaches to positive life-span development
- Positive psychological well-being in children and adolescents
- Psychological adjustment and health

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
