# Health Promotion and Quality of Life Improvement among Patients with Prostate Cancer

# Message from the Guest Editor

Health promotion and improved quality of life for individuals after prostate cancer treatment are important for underserved prostate cancer survivors, including those from racial/ethnic backgrounds and those coping with advanced prostate cancer. Thus, I am delighted to extend an invitation for the submission of unpublished research to the Special Issue of the International Journal of Environmental Research and Public Health. The scope of the issue will cover unpublished and novel research, including a wide range of methodologies such as clinical trials, interventional studies, observational studies, qualitative research, systematic reviews and meta-analyses. Possible topics include, but are not limited to, health and quality of life enhancement, with a specific emphasis on racial/ethnic minority populations (such as Black, Hispanic, Asian) and other medically underserved groups affected by prostate cancer. The health and quality of life enhancement may focus on mental health or behavioral/psychosocial interventions (e.g., exercise, mind-body). Additionally, we welcome submissions examining concerns relating the quality of life in men diagnosed with advanced prostate cancer.

# **About the Journal**

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
