

Special Issue

Advancing Health Services and Systems for Vulnerable Populations including People with Chronic Conditions

Message from the Guest Editors

This Special Issue of *IJERPH* is dedicated to celebrating our achievement and progress in this significant area by sharing international research findings, including (but not limited to) findings in the fields of risk factors, self-management and support, adherence to medications/treatment, family/carer and community support, participation in prevention services, access to primary/secondary/tertiary care, clinical information systems, case management, life expectancy and deaths, models of care, coordination of care, patient-centred care, transitional care (for example, between primary and secondary/tertiary care), cultural safety/competency for vulnerable populations, health system design/re-design, rehabilitation services, surveillance system, telehealth, and policy and procedures in the health system. It is our intention and hope that this Special Issue will provide the most recently updated and high-quality evidence to guide our practice worldwide to benefit people with chronic conditions, their families, communities, and society in general.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
