New Challenges and Trends in Physical Activity and Leisure

Message from the Guest Editor

Physical activity should be seen as a protective factor for health and should be promoted as early as possible. In this sense, nowadays physical activity is understood as one of the main modifiable factors protecting chronic non-communicable diseases and, at the same time, promoting health and well-being.

New challenges and strategies arise for the practice of physical activity such as telehealth, and the new environments in constant change. This can be targeted globally or to specific target groups throughout the life cycle, such as pregnancy, postpartum, childhood, aging, or persons with conditions. This activity, which leads to metabolic expenses, can be done in different contexts, such as school, work, or leisure environment.

Some strategies and tools such as telerehabilitation, Apps, and monitoring allow an assessment and monitoring of physical activity performed, which promotes greater literacy and health responsibility for each individual. However, it is still possible to face some challenges such as the definition of policies that promote physical activity and leisure, and their monitoring and evaluation.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
