

Special Issue

Psychosocial Impact in the Post-pandemic Era

Message from the Guest Editor

This Special Issue aims to provide a platform for researchers to explore and contribute original research articles, reviews, and perspectives that shed light on the psychosocial effects of the pandemic, as well as strategies for addressing them. We invite submissions covering a wide range of topics related to the psychosocial impact of the pandemic, including, but not limited to, mental health implications and coping mechanisms; social isolation and loneliness; changes in interpersonal relationships and social dynamics; socioeconomic disparities and their effects on mental well-being; psychological resilience and adaptation strategies; impacts on vulnerable populations, including children, the elderly, and marginalized groups; innovative interventions and support systems for promoting psychosocial well-being; approaches from emergency and disaster psychology; and impacts on the education or educational processes of children and adolescents, among other aspects.

Guest Editor

Dr. Wanderlei Abadio De Oliveira

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
