

Special Issue

Spatial and Digital Epidemiology of HIV/AIDS and Other Sexually Transmitted Infections

Message from the Guest Editors

This Special Issue calls for high-quality original research articles and reviews concerning subjects including, but not limited to, the following:

- Applications of epidemiologic research using geospatial data or methods exemplify close integration of theories, spatial methods and inferences to study the epidemiology of HIV and other STIs;
- The implementation of spatial and temporal statistical models to identify, quantify and predict variables of interest in HIV and other STI epidemiologies;
- Spatial composite indicators for monitoring the spread of HIV and other STIs;
- Developing and evaluating novel spatial analyses or geographical linkage methods to measure health-relevant population exposures and disease outcomes;
- The identification of spatial and temporal trends;
- Prediction methods revealing spatial and temporal patterns of HIV and other STIs;
- The design and evaluation of geospatial strategies to control the spread of HIV and other STIs.

Guest Editors

Dr. Diego Fernando Cuadros

Digital Epidemiology Laboratory, University of Cincinnati, Digital Futures, Cincinnati, OH 45221, USA

Dr. Godfrey Musuka

International Initiative for Impact Evaluation, #16 Mon Repos Building, New Lands, Harare, Zimbabwe

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
